

# ZYLPHA

INNOVATIVE : CONNECTED : SOFTWARE

**Zylpha is a software house Providing specialist solutions for both solicitors and legal departments of commercial organisations and local authorities.**

Zylpha's innovative product range is designed to provide simple to use solutions to the day to day challenges of legal professionals...and in a way that maximises efficiency and the use of time. If you are fee earner you can create more time to spend on earning fees. If you are a busy legal executive, you simply get more done.

## Products

The list of products is constantly growing and the range now spans:

...dealing with the requirements of anti money laundering legislation (identityPLUS)

...processing (through PCOLPLUS) the trickle of repossessions that is anticipated will shortly become a rush

...to our newest product CourtBundle which has wide application for those dealing with the UK's many different legal processes.

## Background

Zylpha's founder is Tim Long who has an unusual CV that includes qualifying as a solicitor, spending several years as a Product Director for Visualfiles® and SolCase® and working as a software developer at the sharp end. His passion is creating software that not only works, but is simple to use and saves time...lots of it!

## Services

Zylpha draws its practical experience from many year's work focussing on the successful use of case management systems, initially Visualfiles® and Solcase®. With a deep and intimate knowledge of how the British legal system works, this experience has now been applied across a wide range of disciplines. Examples of the services we are able to provide are:

- A systems health check
- An IT strategic review
- Bespoke software development

*We have heard all the phrases "that's impossible" and "it can't be done". That is the point at which we turned to Zylpha.*

**Bott & Co - Solicitors**
